

TINCKARMS

## Tinck Arms semi-automatic carbine Perun X16 cal.

The Perun X16 is a new platform to meet the future needs of sports, police and military around the world. It was developed with the aim of improving the already established AR15 platform system. The patented operating system is characterized by reliability and ease of maintenance.

It is mainly characterized by good balance, handling and very smooth shooting, which enables greater accuracy when shooting quickly. The Perun X16 also features extremely high modularity and compatibility with parts developed for the AR15 platform.

<b>Article no.:</b>	Perun X16
